

Restoring and protecting the beauty and brilliance of our world's infrastructural buildings and historical structures requires products that are both extremely sensitive in cleaning natural building materials and are effective.

Our unique products will remove rust, stains, chalking, efflorescence, atmospheric stains and dirt without etching, pitting or damaging the surface.

Our high performing and environmentally safe technologies do not contain bleach, abrasives, caustics, petroleum distillates, muriatic acid or hydrofluoric acid.

The SEI Cleaning & Restoration Technologies contain properties that lower surface tension, making cleaning easy and non-aggressive.

These products can be used on stone, brick, masonry, unglazed ceramic, porcelain, fiberglass, Formica, plastics, marble (unpolished or unglazed), tile, VAT tile, linoleum, travertine, granite, limestone, sandstone, rock, stucco, terrazzo and terra cotta.

ADVANCED CHEMICAL
TECHNOLOGY™

SAFE / EFFECTIVE / ECONOMICAL

Architectural Restorer

- Works on almost any surface including polished marble and granite.
- Environmentally safe.
- Has an optical brightening agent that makes whites whiter colors brighter.
- 100% Biodegradable.

Heavy Duty Restorer

- Used to restore brick, masonry, granite, stucco, terrazzo and terra cotta.
- Contains no hydrofluoric acid.
- Works in only 15 minutes.

Metal Restorer

- Specially formulated product for restoring metal surfaces.
- Quickly removes oxidation, rust, mineral deposits, etc.
- Works on copper, brass, bronze, stainless and aluminum.
- Works in 15 minutes.

Masonry Rust Remover

- Used to remove rust stains from masonry.
- Used to restore stone, brick, masonry, concrete, travertine, granite, limestone and other similar surfaces.
- Ready to use & works in 15 minutes.

Limestone Cleaner

- Use as a one application system, no need to wet surface or to neutralize.
- Does not contain harsh solvents, phosphates, caustics or acids.
- Will not etch glass & works in 15 minutes.
